Launched in 2014, EDCTP2 set itself challenging targets in its efforts to advance the development of medical interventions against poverty-related infectious diseases affecting sub-Saharan Africa, while simultaneously strengthening clinical research capacity in the region. As we reached the nine-year mark, we take stock and consider how EDCTP2 investments – €826 million to date – are contributing to
the fight against poverty-related infectious diseases, now and into the future. In our Annual Report for 2022, we connect the numbers to the impact the programme is having in sub-Saharan Africa.

Eleventh EDCTP Forum

From 7-10 November 2023, the Eleventh EDCTP Forum will take place in Paris, France. Registration is open, and various sponsorship opportunities are available. We invite you to read the following information carefully:

**Registration**
Registration for the Eleventh EDCTP Forum is now open, and details on both in-person and virtual participation are currently available online. The (extended) deadline for early-bird registration is **31 July 2023**. More information »

**Sponsorship opportunities**
Sponsorship opportunities at the Eleventh EDCTP Forum aim to profile and raise the
visibility of organisations working in the same field as EDCTP. We invite you to browse through the various sponsorship packages on our Forum website. Please note that sponsorship applications are reviewed on a rolling basis. 

More information »

EDCTP mourns the loss of Dr Søren Jepsen

On 9 September 2022, our former General Assembly member and vice-chair of the Board Dr Søren Jepsen passed away due to illness. He will be dearly missed by the EDCTP family, and remembered fondly for his contributions to the programme as well as to the broader field of poverty-related infectious diseases.

Dr Jepsen served as a General Assembly member for Denmark in the first programme of EDCTP (EDCTP1) and as vice-Chair of the EDCTP Board between May 2010 and November 2013. In these positions, he made important contributions to increasing the support and commitment from EDCTP's member states, and to the preparations for the second EDCTP programme (EDCTP2).

Dr Jepsen was dedicated to the development of medical products to prevent and treat malaria, as a Principal Medical Consultant at Statens Serum Institut (Denmark) and head of the European Malaria Vaccine Initiative (EMVI), among others. In his work, he always recognised the value of partnerships and collaborative efforts. By doing so, Dr Jepsen has left his mark on the global research community.

We extend our sincere condolences to Dr Søren Jepsen’s family and friends.

Four EDCTP-supported laboratories join CEPI Centralized Laboratory Network

Four African vaccine testing labs recently joined the CEPI Centralized Laboratory Network (CLN). As members of the CLN, each institution will be on standby to support the rapid development of novel vaccines against a future 'Disease X'. EDCTP has sustainably funded the work of the centres owning the laboratories through projects such as Regional Networks of Excellence schemes, fellowships, clinical research and innovation (RIA) programmes, and clinical research network for epidemics (ALERRT and PANDORA-ID-NET). We extend our warmest congratulations on this next step to Institut Pasteur de Dakar (Senegal), KAVI Institute of Clinical Research & University of Nairobi Institute of Tropical and Infectious Diseases (Kenya), Synexa Life Sciences (South Africa) and Uganda Virus Research Institute (Uganda).

The TRUST code gets a new name

In 2018, the TRUST consortium launched the Global Code of Conduct for Research in Resource-Poor Settings in the European Parliament. Five years later, the Code is successfully used all over the world to promote equitable
research partnerships, having been adopted across the research cycle by funders, research organisations and publishers. The only concerns ever raised were about the name, in particular the phrase 'resource-poor' in the title. Therefore, the code has been renamed to The TRUST Code – A Global Code of Conduct for Equitable Research Partnerships.

WHO Call for Experts - Technical Advisory Group on Genomics

The World Health Organization (WHO) is seeking to establish a Technical Advisory Group on Genomics to support and provide technical guidance on activities implemented by the WHO Secretariat to accelerate access to genomics technologies for global health, with a particular focus on human genomics. WHO welcomes expressions of interest from professionals with expertise in a diverse set of fields related to genomics (and in particular human genomics), the application of genomics technologies for cancer, congenital disorders, rare diseases, R&D in the field of genome-based knowledge, and implementation of genomics technologies. Attention will also be given to ensure inclusion of relevant expertise in ethics, law and relevant social sciences domains. Deadline for applications: 16 July 2023.

Recent events

AU-EU Innovation Festival
15th June 2023
Cape Town

#AUEU #InnovationFestival
EDCTP Africa Office at AU-EU Innovation Festival | Cape Town, South Africa, 15 June 2023

Hosted by the European Union, the African Union and the Republic of South Africa, the first AU-EU Innovation Festival took place on 15 June 2023 at the Cape Town International Convention Centre in South Africa. The event aimed to gather views and aspirations on the imminent implementation phase of the AU-EU Innovation Agenda and of its short-term actions, foreseen to run within the first three years of the adoption (June 2023 - June 2026).

EDCTP’s Africa Office attended the festival and hosted a booth on EDCTP2 and the Global Health EDCTP3 Joint Undertaking. The day before the festival, Dr Thomas Nyirenda, EDCTP Strategic Partnerships & Capacity Development Manager and Head of Africa Office, attended the ENRICH in Africa Center inauguration. ENRICH in Africa is a Horizon 2020 project that aims to strengthen and connect innovation ecosystems in Africa and Europe. The ENRICH in Africa virtual community platform includes 439 members, 293 of whom being companies (64% from Africa and 26% from Europe), 86 investors and 60 business support organisations, such as incubators and accelerators.

2nd International Post-Tuberculosis Symposium | Stellenbosch, South Africa, 17-19 April 2023

On 17-19 April 2023, the 2nd International Post-Tuberculosis Symposium took place at Stellenbosch Institute for Advanced Study, South Africa. The aim of the symposium was to increase global awareness of post-TB medical complications and economic and psychological consequences, and to empower TB-affected communities.

There are an estimated 155 million survivors of TB alive currently. It is estimated that 20-30% of TB survivors may have some form of disability or impairment, the most common being post-TB lung disease (PTLD), and economic, social and psychological impairment. Despite emerging evidence, there is still a lack of international guidelines and recommendations on the follow-up of patients beyond the cure of TB.

At the meeting, the current state of knowledge on post-TB lung disease was presented, and research priorities were defined, emphasising the need to embed lung health outcomes in clinical TB trials. EDCTP was represented at the meeting by Dr Thomas Nyirenda, EDCTP Strategic Partnerships & Capacity Development Manager and Head of Africa Office.

PREPARED plenary meeting

The EU-funded PREPARED consortium held its Paris plenary on 6-8 June 2023 at the UNESCO Headquarters in France. The project brings together a network of researchers, funders, policy makers, NGOs, citizens and publishers to create a values-based framework for research ethics and integrity for the next global crisis. EDCTP was represented at the meeting by Dr Michael Makanga (Executive Director) and Dr Michelle Singh (Project Officer).

Highlights from Paris included the renaming of the Global code of conduct to the TRUST code, and the launch of the One seat, one billion people: Advocating for a G21 policy brief.
calling on the Group of 20 (G20) to consider representation for 96% of Africa’s population by adding the African Union.

**Project news**

**PrEPVacc HIV prevention study completes enrolment**

Participant enrolment into the PrEPVacc trial at all four sites in East and Southern Africa has been completed. Led by African researchers, PrEPVacc is the first HIV vaccine efficacy trial to be conducted in East African countries and it is the only HIV vaccine efficacy trial being conducted in the world at present. PrEPVacc is testing two different ways to prevent HIV at the same time, which includes HIV vaccine regimens against a placebo (saline), and a new form of oral pre-exposure prophylaxis (PrEP) against the existing standard for PrEP.

**STOP-ALIVE trial completes recruitment**

On 24 March 2023, the STOP team in Ethiopia concluded the last visit of the last participant in the ALIVE trial. The study will generate key evidence to support a licensing decision on the albendazole–ivermectin co-formulation. This combination could improve the effectiveness of mass drug administration campaigns against common but neglected parasitic worm infections, and protect a vital drug against the development of resistance. A total of 3912 school children were screened and 861 were randomised and treated in the three trial sites (Ethiopia, Kenya and Mozambique) during phase III of the ALIVE trial.

**MTBVACN3 first annual project meeting**

From 15-18 May 2023, the first annual progress meeting of the MTBVAC phase III clinical trial (MTBVACN3) project took place in Andasibe and Antananarivo, Madagascar. MTBVACN3 will evaluate safety and efficacy of MTBVAC administered intradermally in 7120 healthy, BCG-naïve, HIV-uninfected newborns born to HIV-uninfected mothers and HIV-infected mothers without known exposure to close/household TB contacts.

The consortium, composed of nine partners in total of which six recruiting sites (one in Madagascar, one in Senegal and four in South Africa), discussed the progress achieved in the past 12 months. The sites are recruiting at an increasing rate, with almost 300 newborns by May 2023. The attendees also visited the Institut Pasteur de Madagascar in Antananarivo with its research and clinical labs and vaccination facilities.

**DIAGMAL progress meeting**

The third DIAGMAL project progress meeting took place in Swakopmund, Namibia on 4-5 May 2023, organised by the University of Namibia. The DIAGMAL project evaluates the diagnostic performance of a simple molecular diagnostic platform in different malaria-endemic settings in Burkina Faso, Ethiopia, Kenya, Namibia and Sudan, and aims to diagnose malaria in over 5000 people in the different partner countries. The work has a strong health economy component led by the London School for Economics & Political Science. The first results of the diagnostic and health economy evaluation indicate that the platform performs at least as well as expert microscopy, and confirmative qPCR studies are initiated. The consortium will present updated results at the upcoming Eleventh EDCTP Forum in Paris in November 2023.

**PedMAb annual meeting**

The PedMAb consortium held their second annual meeting in Durban, South Africa on 13-14 April 2023. The consortium is conducting a phase I/II study to determine safety and pharmacokinetics of subcutaneous administration of potent and broad anti HIV-1 neutralizing monoclonal antibodies (bNab), given to HIV-1 exposed neonates and infants. The meeting brought together the entire PedMAb consortium, with partners from France, Italy, Norway and South Africa. The meeting participants reviewed trial progress and further developed technical approaches.

**ASAAP annual meeting**

The ASAAP project held its annual meeting in Cotonou, Benin on 6-7 June 2023. ASAAP is a clinical trial to evaluate the efficacy, safety, tolerability and pharmacokinetics of a new antimalarial combination drug, with a particular focus on its successful application in one of the largest and most vulnerable demographics of Africa: children 0-5 years old. During the meeting, the project partners addressed current challenges and reinforced engagement to ensure timely completion of the project. Practical sub-group sessions were held with the data management, clinical monitoring and pharmacovigilance teams to streamline data capture, handling of queries and harmonisation of safety reports.

**UNIVERSAL General Assembly meeting**

The UNIVERSAL General Assembly meeting was held in Harare, Zimbabwe on 22-24 May 2023.
The UNIVERSAL project aims to develop two antiretroviral fixed-dose combinations for infants and children newly diagnosed with HIV. These formulations will also benefit children living with HIV whose first-line therapy is failing, and by monitoring the long-term safety and efficacy of other paediatric ART formulations, the project will provide better treatment options for children with HIV. As the project moves forward, the discussions held set a positive tone for the future.

BCA-WA-ETHICS II advocacy report

The Building the capacities of West Africa in research ethics (BCA-WA-ETHICS II) project has published an advocacy report on research ethics violations in Africa. The report explores Africa’s long history of research ethics violations and proposes a framework and a set of lessons learned for more rigorous and harmonised research ethics practices in the present and future. It also provides an insightful perspective on health-equity-centered research ethics and how to achieve it through community-engagement and sex- and gender-sensitive ethical review of research protocols.

HISTOIRE AFRICAINE DES VIOLATIONS DE L’ETHIQUE DE LA RECHERCHE: LEÇONS POUR L’AVENIR

BCA-WA-ETHICS II: CNERS Senegal obtains ISO9001 certification

The Comité National d’Ethique pour la Recherche en Santé (CNERS) of Senegal has achieved ISO9001 certification: a globally recognised stamp of approval that assures an organisation’s commitment to quality and continual improvement. It demonstrates that an organisation has implemented a robust quality management system that meets international standards, focusing on client satisfaction, management processes, and continuous
improvement. This achievement is part of the EDCTP-funded BCA-WA-ETHICS II project’s efforts to strengthen research ethics governance in West Africa.

BCA-WA-ETHICS II article on project results

The BCA-WA-ETHICS II project published a brief article on The Global Health Network website on the results to date. Among others, the project has trained over 150 scientists and bioethicists from 14 African countries in the aforementioned areas. It also offered a Virtual research ethics secretariat that aided National Research Ethics Committees in establishing sex- and gender-sensitive research evaluation tools and standard operating procedures. The secretariat currently collaborates with seven countries. Guinea-Bissau and Senegal have already implemented the sex- and gender-sensitive guidelines for research evaluation on a national level.

Publications

EDCTP is a member of Europe PMC. This enables EDCTP-funded researchers to share their publications via one central location. Sharing publications by EuropePMC also ensures that they will satisfy the requirements for EDCTP-funded research projects: making publications openly accessible as soon as possible.

Submit your manuscript through Europe PMC Plus

Training and funding opportunities

**AREF Essential Grant Writing Skills Programme | Deadline for applications: 16 July 2023**

The Africa Research Excellence Fund (AREF) is calling for applications from scientists who are active, emerging biomedical/health researchers in African countries to participate in the forthcoming Essential Grant Writing Skills Programme. The workshop aim is to enable talented early-career health- and health-related researchers from countries in Africa to build skills to develop their own research and fellowship proposals of the quality required to win competitive international, regional, and national funding.  
[More information »](#)

**AREF Research Development Fellowship 2023/24 | Deadline for applications: 14 September 2023**

The Africa Research Excellence Fund (AREF) has launched a call for the AREF Research Development Fellowship Programme for 2023/24. The aim of the programme is to provide opportunities for talented health researchers based in Africa, so that they can lead research that is responsive to its African settings and can contribute to reducing the burden of disease.

**Wellcome Trust (UK) Funding Opportunities for Applicants from LMICs**

**Wellcome Early-Career Awards**

This scheme provides funding for early-career researchers from any discipline who are ready to develop their research identity. Through innovative projects, they will deliver shifts in understanding that could improve human life, health and wellbeing. By the end of the award, they will be ready to lead their own independent research programme.

Application deadline: 5 October 2023

**Wellcome Career Development Awards**

This scheme provides funding for mid-career researchers from any discipline who have the potential to be international research leaders. They will develop their research capabilities,
drive innovative programmes of work and deliver significant shifts in understanding that could improve human life, health and wellbeing.

**Wellcome Discovery Awards**
This scheme provides funding for established researchers and teams from any discipline who want to pursue bold and creative research ideas to deliver significant shifts in understanding that could improve human life, health and wellbeing.

Application deadline: **25 July 2023**

**MRC Clinical Trials Unit online MSc courses**
The Medical Research Council Clinical Trials Unit (MRC CTU) at University College London (UCL) offers online MSc courses in Clinical Trials and in Statistics for Clinical Trials. The online [MSc in Clinical Trials](#) provides grounding in management and design of clinical trials, and enhances knowledge and understanding of those already working in the field. The online [MSc in Statistics for Clinical Trials](#) develops knowledge and know-how of statistics in clinical trials. This training is relevant for future clinical trial statisticians, and as well as clinicians and other health professionals who have a strong quantitative interest in trials. The courses start in September 2023.

**EDCTP events**

**Eleventh EDCTP Forum | Paris, France, 7-10 November 2023**
From 7-10 November 2023, EDCTP will hold its Eleventh EDCTP Forum, hosted in Paris, France, at the Palais des Congrès de Paris. The Forum theme is "Partnering for Global Health Research Innovation and Impact in Africa - Celebrating EDCTP: two decades and beyond". Registration is now open for both in-person and virtual participation, and EDCTP sponsorship opportunities are available to profile and raise the visibility of organisations working in the same field as EDCTP. We invite you to visit the [Eleventh EDCTP Forum website](#) for more information.

**Other events**

**Launch of the GloPID-R Africa Hub | 22-23 August 2023**
The official launch of the GloPID-R Africa Hub will take place on 22-23 August 2023 in Cape Town, South Africa and online. As part of the GloPID-R Regional Hub strategy, the Africa Hub will facilitate the coordination of funders of research on infectious diseases with pandemic and epidemic potential while helping to strengthen regional ownership and address inequity in the distribution of research funding. The initiation of the Africa Hub has been made possible through a grant from EDCTP funded by the UK Department of Health & Social Care. This event is organised by the South African Medical Research Council, host of the Africa Hub. More than 100 delegates are expected to attend including funders, policy makers and key stakeholders from the African continent and beyond. [More information »](#)

The annual International Conference on Public Health in Africa (CPHIA) provides a unique African-led platform for leaders across the continent to reflect on lessons learned in health and science, and align on a way forward for creating more resilient health systems. Expanding the horizons of the conference once again, CPHIA 2023 will showcase how the continent is breaking down barriers, reaffirming Africa as a powerhouse in science and innovation, generator of new knowledge and health products, and exemplar of progress.
